TEST 400™

TEST400™ a major breakthrough in strength augmentation combines 3 pharmaceutical grade pro-steroidal compounds in specific dose and ratio with the latest Self-Micro Emulsifying Drug Delivery System (SMEDDS), maximizing bio availability and absorption. Before now the only end goal of muscle building agents on the market was a cosmetic boost in muscular size. Fight Labs™ however, knows the importance of FUNCTIONAL STRENGTH. Bloated muscle means nothing to the elite fighter or strength trainer. What matters is the raw strength that comes from superior anabolism, the kind of strength that will ignite an explosive muscular contraction beyond expectation. TEST400™ delivers on that promise by combining compounds never before available until now, in the proper dose and ratio and will deliver results when you need it.

RECOVERY 911™

RECOVERY 911™ goes beyond Post-Workout Recovery: This is Post-FIGHT Recovery. This formula was specially formulated to repair damage specific to high intensity training seen in elite fighters, strength trainers, power lifters and bodybuilders. High intensity training and fighting will use up energy stores, deplete the body of anti-oxidants, increase muscle breakdown, lower nitric oxide levels and acidify the blood. It is absolutely essential to counteract these effects to continue fighting at your peak level. Fight Labs™ has engineered a solution addressing these critical areas of recovery - BCAAEe™ (Branch Chained Amino Acid Ethyl esters) to help muscle recovery, Advanced Creatine compounds to restore explosive energy, Beta-Alanine and Potassium Bicarbonate for pH balance/endurance, Nitric Oxide optimizers to maintain peak performance, essential anti-oxidants as well as blood sugar support. Perhaps the most important thing a recovery drink needs is great taste, and that can be difficult with so many powerful compounds infused into one product. Fight Labs™ went the extra round to make sure every sip of this drink leaves you wanting more, without unnecessary sugars to slow you down.
